

Lab Grading

- Prelab (5pt max) – Each student will turn one of these in, so this is an individual grade.
 - Grade determined simply by Ceiling(5* (# problems correct) / (# problems))
- Participation (5pt max) – Again this is an individual grade for each student. The following here are some benchmarks for how the participation grade will be assigned
 - 0pt – Student missed the lab entirely or missed more than 20min of the lab
 - 2pt – Student missed 5-20min of the lab or did not contribute much to the group
 - 4pt – Student was in attendance essentially the entire time and contributed constructively most of the time but sometimes got distracted with personal/social matters (such as using phones, social media)
 - 5pt – Student was in attendance the entire time and work diligently.
- Completion and accuracy of the lab problems (10pt max) – Group grade
 - Each problem has a set maximum value given on the lab sheet totaling 10pts overall. Problems are graded on correctness, but partial credit is possible.
